It is the largest and most prosperous city of Switzerland and although possessing little of interest in itself, is associated with many distinguished names in history. Early one morning we take train from Geneva for the Mt. Cenis route into Italy. We pass through a mountainous region, abounding in lovely views and wild scenery and after riding 125 miles reach Modane on the Italian frontier. Just beyond Modane we enter Mt. Cenis tunnel, which was completed fourteen years ago after thirteen years of work, at a cost of \$15,000,000. It is eight miles in length, 19 feet high, 26 feet wide and about 4,000 feet above the sea and 3,500 feet below the summit of the mountain. Our train occupied just 27 minutes in passing through its gloomy depths. Beyond the great tunnel, the wild, barren mountains tower high above the narrow valley down which we speed, and numerous spurs of the range necessitate dozens of smaller tunnels. We reach Turin late in the afternoon and after a few hours spent in this modern Italian city, which was the capital of Italy from 1859 to 1865, we go on to Genoa, where we pass the night. is familiar Genoa, "La Superba, to every American school boy as the home of Columbus. Life has lost its zest, and there is no government by the people. charm in the toys and amusements of vesterday. You must admit that a woman marries for convenience. She wants a home, protection, immunity from labor and the delights of companionship. Now, if a man makes this home, if he stands between her and danger, if he contributes the best interests of his life for her maintenance, he certainly is entitled to his reward. He wants his home beautified, filled with friends and good cheer; he wants to be petted, admired, respected, encouraged and loved.

Oh, yes, you may say petting is all nonsense, but just let me tell you that you are mistaken, and it the husband cannot get loving affection at home he will get it some place else. Caresses can be bought like every other luxury.
